DATE RECEIVED

To whom it may concern,

I believe the suggested water supplied to Mt Lacom is set to rise by 1300%, how can this be allowed to happen. I believe this water rise will stop further population growth of this town, which consist of many elderly and struggling families now.

I believe due to the high costing of housing in local league towns has recently brought families to Mt Lacom and now I believe with the water ratings to rise will cause them to the desert, and stop our town ever going ahead.

I believe the suggested water rise will only cause families to want back to the old days as such. When tanks & dams carried out the domestic water duties.

I have chosen to become a Mt Lacom resident with all the modern utilities, and I work hard to make ends meet, like most families in the town.

I hope to see this town of Mt Lacom
grow into a large community, but
with this suggested water price it
not affordable and so the town is likely
to dry up and die.

I believe Mt Lacom
will have no option but to disconnect
from the utahulated supply and revert
back to tanks.

I believe all Mt Lacom
residents all water wise at all times and
save as much water as possible, but when
it comes to the suggested pricing of water
it is a little harder to save the penny.

I believe we in Mt Lacom
are not second class Citizens everyone is
equal and should be treated as such
in all things.

Thank You
Wynne Ab
