

Cairns Hockey has over 1200 members- 600 plus being juniors and young people. Our aims are not for profit to provide community benefit through the delivery of healthy, active and safe activities for men and women of all ages. The regular exercise is part of the sustaining community well-being and the more people involved the better the community. We need floodlighting 6 nights a week and the costs are already high and the increases will see our association prejudiced unreasonably. We cannot pass on the increases so our organization will be significantly disadvantaged to the point of having to pay accounts from savings not usual operations budgets. This impacts the safety of the facility as we will have less money to effect repairs and could see the facility or parts of it go into disrepair. Our members don't deserve this.
