Subject: Water pricing

As Chinchilla weir water users were not happy with the proposal.

- Having paid top prices for land with water entitlement is enough incentive for us to use water.
- Can be plenty of water available at crop establishment but 3mths later when its really needed its just not there.
- 7 of the last 10 years have had extended periods with no water available.
- Through these periods it hurts paying part A charges eve at \$18.84.
- On this scheme it would be fair to decrease part A and increase part B.
