Note 1: 1,001 (76%) of the 1,319 Interruption duration GSLs paid in the September 2016 quarter were the result of a severe weather event on 24 June 2016 which caused considerable damage to the network. Due to processing timeframes these GSLs were validated and paid in the September 2016 quarter.

Note 2: An additional \$12,640 was paid during the October to December quarter as backpayment for a calculation issue affecting 84 GSL's reported in previous quarters. These figures will not appear in the above report as the original GSL numbers were reported and were modified to organise the payments.

Note 3: Connection not provided by the agreed date GSLs increased in the October – December 2016 quarter when compared to previous quarters. This increase is attributed to a number of weather events throughout the quarter which resulted in an increase of emergency work and, subsequently, impacted the scheduling of customer service work due to limited crew availability.
